

Card Title	Card Number	Engagements
Hands-on activities for Prototyping and Ideation in Biomedical Engineering	684	330
QS4EML Course Modules for "BME Best Practices"	688	39
QS4EML Course Module for "Biomechanics"	830	103
QS4EML Course Module for "Introduction to Biomedical Engineering"	888	97
QS4EML Course Modules for "Engineering in Orthopedics" elective	895	76
Using Maker Projects to Spark Interest in STEM	932	174
Introduction to "Internet of Things" technologies: Build your own survey kiosk project.	971	45
Active Learning Modules to Simulate Surgery in "Engineering Applications in Orthopedics"	1047	158
Reinforcing Technical Topics Through Hands-On EML Design Modules	1106	62
Building Interactive Wearable Technology Devices to Motivate Hands-on Experience with Biomechanics and Biomedical Engineering Design	1449	365
How to include EML in technical courses with "Quantified Self" themed modules	1715	128
QS4EML Course Module for "Medical Device Design"	1862	95
QS4EML Course Modules for "Bioinstrumentation"	1909	115
Designing Stakeholder Value with the Sit-To-Stand (S2S) Movement	4297	9
Grip Strength Data Analysis	4605	5
Using Smartphone Inertial Measurement Unit (IMU) Sensor Data	4618	6
Video Analysis for Biomechanics of Human Movement	4619	2
Biomechanics Swing Sensor Entrepreneurial Design Project (revised)	4626	2
Reverse Engineering Module in Wearable Technology Design	4628	50
AI SCAMPERing through Brainstorming	5209	67
Engineering for Dignity: Redesigning Load-Bearing Devices for Older Adults	5290	5
KNC2026 Workshop- Explainable AI for Educators: Strategies to Engage Student Use and Inspire an Entrepreneurial Mindset	5797	24
Biomedical Engineering Essential Skills	5823	4
		1961
